

# Environmental Policy

An established manufacturer of glass reinforced plastic materials and products, CME is committed to conducting its business operations in an environmentally responsible manner. This will include:-

- Meeting or exceeding applicable environmental regulatory and other requirements,
- Preventing pollution and waste,
- Improving the efficiency of energy usage and conserving natural resources,
- Measuring and tracking carbon emissions with an aim to reduce the impact on the environment,
- Striving for continual improvement in environmental performance, where technically and economically viable.

CME will achieve these outcomes by the implementation and maintenance of an Environmental Management System that meets the requirements of ISO14001.
